## SUMMARY

Computer Engineering student with experience developing Full-Stack Web Applications and Mobile Applications, covering everything from UI design and Backend development to database management and production deployment. Skilled in React, Node.js, Flutter, Firebase, and MySQL, with a strong interest in software development and continuously learning new technologies.

## ACADEMIC PROJECTS

Personal Finance Management Application (Thesis)

Nov 2025 - Present

- Designed and developed a cross-platform mobile application using Flutter/Dart to help users track income, expenses, and savings goals
- Implemented core modules: transaction recording with category tagging, monthly financial summaries, goal-saving progress tracking with alerts, and spending behavior analysis
- Built interactive data visualizations (bar, line, and pie charts) using fl\_chart to display income/expense trends and category breakdowns
- Designed relational database schema (ER Diagram) with 6 entities to support Firebase/MySQL backend integration
- Applied Provider for state management across a modular architecture (models, services, screens, widgets)

GradieKU — Course Completion Checker Website

Jun 2025 - Sep 2025

- Developed a website to verify completed credits and graduation eligibility, allowing students to check their status instantly
- Built a responsive frontend using HTML, CSS, and JavaScript for use across all devices
- Designed a MySQL database and backend logic to validate graduation requirements
- Built an automated system that calculates credits and displays real-time “Pass/Fail” status

Firefly — Fire Alert Application

Nov 2023 - Feb 2024

- Developed a fire alert application using Flutter, integrated with an MQ-2 sensor for real-time smoke and gas detection
- Built a dashboard displaying live sensor readings with automatic alerts when values exceed safety thresholds
  - Tested system performance to improve the accuracy and reliability of emergency notifications

## EDUCATION

Bachelor’s Degree in Computer Engineering

Jun 2023 -Present

- Kasetsart University
- Major in Computer Engineering

## RELEVANT QUALIFICATIONS

### TECHNICAL SKILLS

- Programming Languages: JavaScript, TypeScript, Python, C/C++, Dart
- Frontend & Mobile Development: React, Flutter, Vite, HTML, CSS, Tailwind CSS
- Backend Development: Node.js, Express.js, PHP
- Database & Cloud: MySQL, Firebase (Firestore, Authentication)
- Tools & Deployment: Git, GitHub, Vercel, Render

### Soft Skills

- Problem Solving
- Fast Learner
- Teamwork and Communication
